INTRODUCTION

Kentucky coal production reached an all time high of 150,143,973 in 1980. The 1980 production of 150,143,973 tons was 306,882 tons higher than the previous record year high of 149,837,091 set in 1979. Kentucky remained the nation's largest coal producing state by outdistancing the nearest rival by twenty-eight million tons. In 1980 over seventy million tons of coal were mined by surface operations while over seventy-nine million tons were mined underground.

The coal industry furnished direct employment for 52,960 miners.

Twenty-one miners were killed in Kentucky coal mine accidents in 1980.

The clay mining industry mined 426,961 tons in 1980. No fatal accidents occurred at clay mines during the year.

The following chart compares production of the various types of coal mines for the past two years:

The Directory and Statistics of Coal Mines contained in the following pages is separated by Inspection Districts and by Counties.

Code letters to classify mines are as follows:

UTC	Underground Truck Coal
URC	Underground Rail Coal
UWC	Underground Water Coal
STC	Strip Truck Coal
SRC	Strip Rail Coal
ATC	Auger Truck Coal
ARC	Auger Rail Coal
ASTC	Auger-Strip Truck Coal
ASRC	Auger-Strip Rail Coal
STCL	Strip-Truck Clay

Notations made are as follows:

a	abandoned
c	change of ownership
*	estimated tonnage
ta	temporarily abandoned
DNO	Did Not Operate

Production, employment, and accident figures for River mines have been included in the totals for Rail mines for the purpose of compiling these statistics.

Many of the coal production figures of individual mines which appear herein have been estimated by the Department. This was necessary because the reports of the operators of those mines, particularly mines which became abandoned during 1980, were deliquent at the time of publication.

Approximately 100 feet of the 600 feet of cable being used was burned before the fire could be extinquished by using water. There were no personal injuries.

SEPTEMBER 6, 1980, MINE NO. 2, LOFTIS COAL COMPANY, INC., CANADA, PIKE COUNTY. A fire occurred at 8:40 P.M. at the face of the No. 5 entry on the Joy 11 RU cutting machine when a tree of leads to the bit motor was pinched between the head and frame of the machine. TRAINING AND EDUCATION

A full time Training and Education program was established in 1971 with a Federal Grant from the U.S. Bureau of Mines, now known as the Mine, Safety, and Health Administration (M.S.H.A.). This is a very effective program and is staffed with ten well qualified mining instructors and five electrical instructors who are stationed in the five district and one sub-district offices and mine rescue stations.

Since March of 1972 this agency has acted as a process agent for the educational institutions in establishing Schools of Mining Technology. Presently the participating schools are Pikeville College, Morehead State University and Madisonville Community College. Also, the Kentucky Department of Education is participating in this grant by offering statewide classes for miners through their Vocational Schools.

The following list shows the type of certificates issued and the number of men/women involved in the different safety courses conducted by this Division in 1980. (This includes both organized classroom work and field work).

MINER TRAINING, EDUCATION AND CERTIFICATION DIVISION

The Board of Miner Training, Education and Certification as provided by Chapter 351, Paragraph 105, Kentucky Revised Statutes, was composed of the following members in 1980:

Willard Stanley ..... Chairman
William Joe Morgan ..... Miner Member—Eastern Kentucky
Paul Patton ..... Operator Member—Eastern Kentucky[1]
Bobby Ray Dukes ..... Miner Member—Western Kentucky
Andrew Adams ..... Operator Member—Eastern Kentucky[2]
H. Tom Barton ..... Operator Member—Western Kentucky
William E. Clayton, Director, Miner Training, Education and Certification Division ..... Non-Voting Member

Pursuant to KRS 351.106 Underground Miner Training and Certification Regulations were implemented in October, 1977. During 1978 the required 48-hour inexperienced miner's program was prepared and the first classes were taught in May, 1978. Through December, 1980, 12,664 persons were issued Temporary Inexperienced Miner's Work Permits; of this number 5,780 were issued during 1980.

After the Underground Miner Training and Certification Regulations were implemented in October, 1977, the Board of Miner Training, Education and Certification established a date of November 1, 1978, as the date all persons employed in underground mines should meet this requirement. As of December 2, 1980, 32,501 persons have been issued underground miner certificates. Of this total, 427 are female miners.

Uniform two-day examinations for Mine Foremen and Inspectors were scheduled by the Board to meet the demand whenever it arose. Examinations were held in the Department offices in Lexington and at various localities throughout the coal fields, whenever the number of applicants made it justifiable. Mr. Doug Monroe served as Chief Examiner in the West Kentucky District and Mr. Cecil Sherman served as Chief Examiner in the Eastern Kentucky District with Mrs. Margaret Caywood as Exam Clerk.

Examinations were multiple choice in character. Applicants were given written examinations on the subjects of Mine Law; First Aid; Ventilation; Apparatus and Electricity; Fires and Explosions; Explosives; General Mining Practices and Gases. Each applicant was tested on his/her ability to detect methane with a flame safety lamp and use an anemometer in the calculation of the rate of air current flow. The miner was further required to prove his/her knowledge of safe mining practices in an interview with the Examiner and to indicate safe and practical method of ventilation on a typical mine map.

A list of those who successfully completed the required examination for foreman and inspectors is shown on the following pages:

RALPH PERRY, DIRECTOR
MINE SAFETY ANALYSIS DIVISION

MINE SAFETY ANALYSIS DIVISION

During the year of 1980, the Division of Mine Safety Analysis completed 430,000 safety contacts and observations.

The Division now has a staff of 59 people, consisting of a Director, 5 District Supervisors, and 53 Analysts in the field. There are 2 Analysts in each district assigned exclusively to roof control, in an effort to reduce the number of fatalities from roof falls. This approach has had a significant affirmative impact. Roof fall fatalities were reduced from 14 in 1979, to 6 in 1980.

The Division also provides teams in each district, trained in the use of self contained oxygen breathing apparatus, for use in mine rescue operations. They are available twenty-four hours a day, and within a one hour drive of any mine in their district. Analysts are also trained in First-Aid, Cardio-Pulmonary Resuscitation, Mine Ventilation, Roof Control, Management Techniques, Mining Methods, and Mining Law.

The goal of the Department of Mines and Minerals, and the Division of Mine Safety Analysis, is to use our knowledge and experience to reduce serious injuries and fatalities to the people in Kentucky coal mines.

The Division of Explosives and Blasting continued its program of inspection, enforcement, education, and licensing of blasters in 1980. A total of 398 new blasters were added to the rolls of those previously licensed in the Commonwealth. As of December 31, 1980, there were 4,285 individuals holding current and valid Kentucky blasters licenses. Approximately 58% of these people are employed as surface coal mine blasters. The other 42% are engaged in construction, quarrying, demolition, seismic exploration, or other explosives related activities.

The division conducted eleven blasters training courses throughout the Commonwealth. These classes were attended by 239 people, licensed blasters as well as applicants for the blasters examination. These courses consist of 30 hours of instruction covering all aspects of explosives use. The overall purpose of these courses is to raise the competency level of the blasters in the field. The public is better protected, and the blasters work environment becomes safer when his ability in blasting is enhanced through education.

The Explosives and Blasting inspectors answered 100% of all public complaints concerning blasting vibration, noise, flyrock, and other related problems stemming from blasting. In addition, they continue to make routine inspections of all blasting operations to ensure compliance with the laws and regulations governing the use of explosives.

The two new Explosives and Blasting Inspectors hired in April of 1980 have filled long standing vacancies in the Hazard and Pikeville Districts. Both men have accomplished much in improving safety for both blasters and the public in these two important areas.

The division is also still operating under an agreement with the Department of Natural Resources Bureau of Surface Mining Reclamation and Enforcement to aid in implementing the explosive regulations of the Federal Surface Mining Act of 1977. Our cooperation with the Department of Natural Resources has permitted continuous and consistent inspection of surface coal mine blasting with a minimum of duplication.

During the year 1980 this division has worked with the Federal Office of Surface Mining concerning their proposed national blasters examination and licensing program for surface coal mining. This program has been in the works for several years, and we have offered advice and criticism of their proposed examination and training.

During the year the division also participated in a number of seminars co-sponsored by other agencies such as the Institute for Mining and Minerals Research, Kentucky Department of Transportation, Rural Electric Cooperatives, etc. It has been our intention to use every opportunity for educating the public and training the blasters in the safe use and potential hazards involved in blasting.
